**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by JP-08-157791 or JP-08-311419.

3. For the purpose of examination, the examiner takes the position that the applicants are claiming a two-layer system, in which the adhesive layer does not require a blend..

4. Each of the Japanese patents are directed to a film comprising a pressure sensitive ethylene / alpha olefin polymeric layer and a substrate layer. The ethylene / alpha-olefin layer has good adhesive properties is made using a metallocene catalyst. Each does have Mw/Mn distributions within the claimed range. It appears that these materials have some degree of crystallinity so would have phase change (a calorie change of greater than 1 J/g) and are solids at room temperature so would have a melting point (a calorie input of greater than 1 J/g) as claimed. The examiner takes the position that the catalyst system used to make the materials coupled with the way the polymers are described, as being adhesive at low temperatures would support the contention that the material would behave as claimed.

***Response to Arguments***

5. Applicant's arguments filed 10-02-2003 have been fully considered but they are not persuasive. The applicants have stated in their response that the materials taught in JP-08-157791 or JP-08-311419 do not have the claimed properties for (a). Claim 1 recites that (a) "the olefin copolymer has neither a peak of crystal melting enthalpy of not less than 1 J/g, nor a peak of crystallization enthalpy of not less than 1 J/g..." The prior art as pointed out by applicants has values of greater than one. The examiner believes that there are too many "negatives" in the claim. If applicants means that they do not want values of greater than 1, then it might be advisable to replace "not less" to "greater".

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
